

Quality Policy

Borras Construction Limited is committed to being a leader in the construction industry by delivering high-quality, safe, and compliant building solutions. Our vision is to provide clients with customised solutions and certainty of delivery, placing excellence at the heart of all we do.

To achieve this, Borras Construction Limited will:

- **Ensure Building Safety Compliance:** Fully comply with the Building Safety Act and all associated legislation by prioritising building safety, risk management, and regulatory adherence in all construction activities.
- **Maintain High-Quality Standards:** Continuously measure, review, and improve the quality of design, build, and contracting services to ensure, as far as reasonably practicable, that buildings are safe, functional, and durable.
- **Enhance Health, Safety, and Welfare:** Establish clear and robust health, safety, environmental, and welfare standards that not only meet but exceed existing legislation and best practice guidance.
- **Promote a Learning and Competency Culture:** Foster continuous professional development and training to ensure all personnel, including designers, contractors, and managers, are competent and accountable under the Building Safety Act's duty-holder framework.
- **Strengthen Collaboration with Supply Chain:** Work closely with suppliers and subcontractors as long-term partners, ensuring they share our commitment to safety, compliance, and high-quality service delivery.
- **Implement Rigorous Review and Assurance Processes:** Continuously assess and refine our internal procedures to enhance safety, transparency, and efficiency, ensuring compliance with the golden thread of information requirements.
- **Provide Documented Building Safety Assurance:** Maintain comprehensive records to demonstrate that safety, quality, and regulatory requirements are consistently met for each project.

To meet these objectives, Borras Construction Limited applies a robust Management System designed to comply with ISO 9001:2015, ISO 14001:2015, and ISO 45001:2023, while fully integrating the principles of the Building Safety Act within our Health, Safety, and Environmental Policies.
